IF YOU’RE A STAG OWNER
(or buying a new one)
add the wheels that add the EXTRA quality to your Triumph.

These exciting aluminium alloy wheels, specially designed for the Triumph Stag, set new standards of safety, strength and styling. They are scientifically tested under the most exacting conditions, including spectrographic analysis and X-Ray examination, to limits normally only associated with aircraft components. Furthermore Kent Alloy Wheels are corrosion resistant thus keeping their good looks for a longer period. Specify them for your new Stag.

If you already own a Stag you can now bring it right up to date with these new wheels.

See your Triumph dealer.
